e-Learning Technical Training (EC-Council iLearn)

EC-Council is the global Information Security Institution that provides training to major private and public sector organisations throughout the world including US Navy, Army, Airforce, and US Department of Defence (DoD), etc.

EC-Council Courses are designed to help organizations and Individuals take pre-emptive measures against malicious attacks, by learning how to identify and defend the weaknesses in their own network. **iLearn** is EC-Council's Official e-learning Training program, where a learner learns through instructor-led self-paced video-based training methodology.

Education is Prevention. This is why **Dezant Consulting** has partnered with the **EC-Council** to offer **E-Learning courses and certification in cyber security** to I.T staff of organisations in Ghana & the ECOWAS region. In all their courses, **practical application is the key**.

The EC-Council portfolio includes training on identifying weaknesses and vulnerabilities (ECSA), penetration testing (CEH) , forensic investigation (CHFI) information security management (CCISO) as well as many specialist courses.

E-Learning (iLearn) Packages & Benefits

STUDY TOURS & SEMINARS

Our Study Tours are highly evaluated due to its practical relevance to businesses and organisations in Africa. We have partners in key countries such as UK, USA, CANADA, UAE (DUBAI), SOUTH AFRICA & MALAYSIA. Our trainers and moderators are among the best in the world and we have partnered with global institutions such the EC-Council, BRCCI, and STOP.THINK.CONNECT.

Conatct us for participation on the next study trip.

CYBER ESSENTIAL WORKSHOPS (CEW)

Our Cyber Essential Workshop is Africa's number ONE event for those looking to find out the latest trend in Cyber security world. This workshop will be held **twice a year** (March 2019 & October 2019) and attendees will include delegates from both public and private sector organisations in Ghana .

Topics include:

- A review of the risk landscape and emerging vulnerabilities that pose a serious threat to business and governments in Africa.
- Protecting against malware, ransomware, social engineering, and other threats
- Cyber hygiene essentials and best practice to identify and plug gaps in your security posture.
- Working in Partnership to reduce the attack surface and solve strategic security challenges
- Cloud adoption strategies and the factors for consideration in choosing a cloud provider
- Security in the cloud and the shared responsibility model
- Real-life cyber security incidents handling, response and deterrence mechanisms
- Understanding threat vectors and actors, trends and priorities
- Building skills, capabilities, capacity and responsiveness

Contact us for sponsorship, participation and product presentation.
